

International Network Extension Solution (Inbound Roaming)

Product Overview

The JT Wholesale international network extension solution for inbound roaming can cost effectively connect your network to our 500+ roaming partners quickly with minimal testing, convenient billing and fraud reporting.

JT Wholesale is a member of the GSMA and has a wealth of knowledge and expertise within the roaming industry. Our solution is a GSMA approved network extension and offers your organisation rapid generation of inbound roaming revenue. In addition Cara Murphy Head of Roaming at JT Wholesale is the GSMA PRD owner of BA21 & BA22 network extensions.

JT Wholesale has partnered with roaming consultants at ROCCO to offer more than just a standard roaming solution. Our combined expertise and resources adds further value in the form of:

Roaming strategy: Short to long term planning & development

Operational set-up: Resources, training, processes, tools and supplier selection

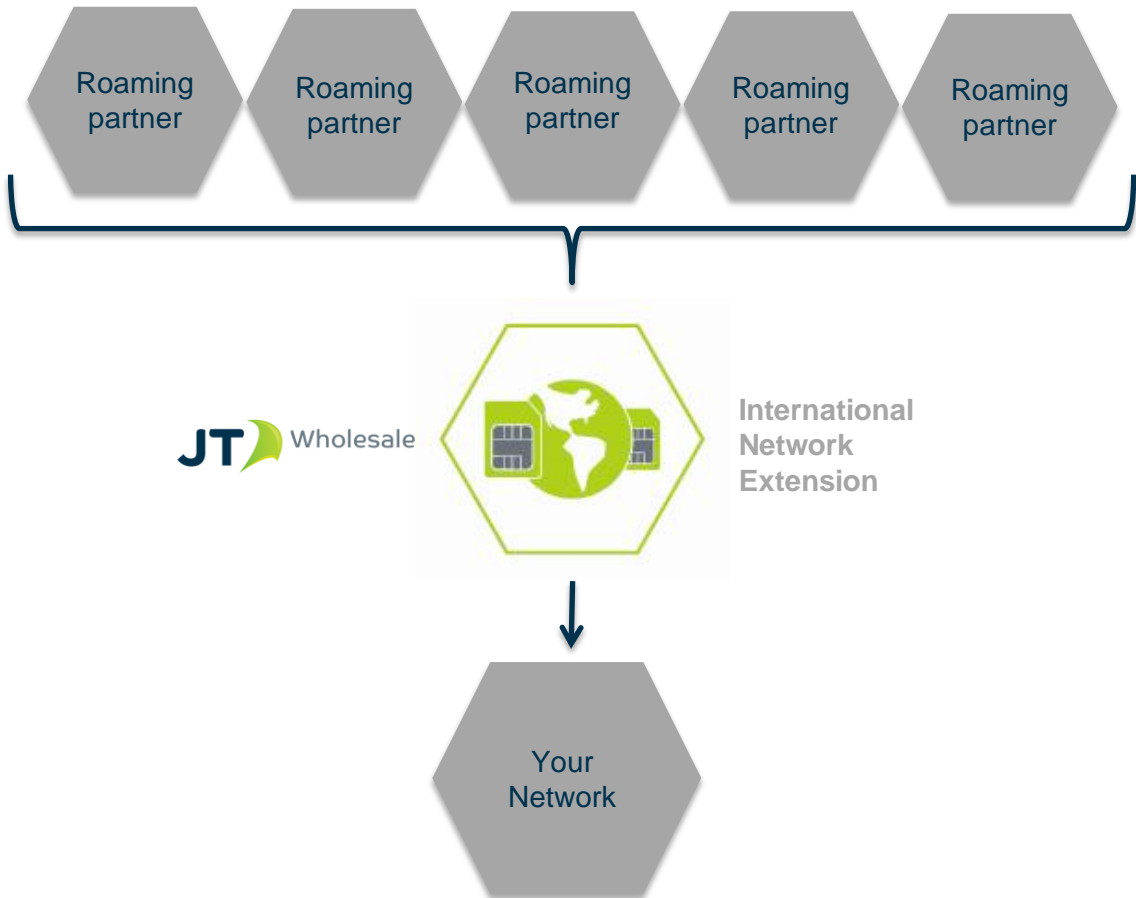

Optimisation: Delivery, progress & growth

Business Case: Low set-up costs & cost effective roaming footprint

Benefits of International Network Extension

- Brings inbound traffic to your network from over 500 global partners
- Provides ability to capture revenues from inbound roamers
- Is seamless to the end user
- Simplifies the management of roaming operations
- Constantly acquire new inbound roaming partners and revenue streams

JT Wholesale has over 500 global roaming partners

Jason Bryan
Chief Commercial Officer at ROCCO

“It makes sense to have professional advisers in our industry because it pays in cost savings to work with experiences people who know what works, in terms of costs, quality and timelines. ROCCO is excited to work with JT as I think we have just the right level of entrepreneurial spirit and dynamism to move fast in our industry”
