JT Managed WAN

Product Description

To remain competitive in today's market, both multi-site enterprise organisations and single premises local businesses need secure and efficient communications. Dynamic networks, robust uptime and secure access are essential and relied upon.

Ensuring seamless monitoring and connectivity, JT Managed WAN (Wide Area Network) delivered, allows cost effective, secure and instantaneous information sharing, enabling businesses to deliver reliable services to employees, regardless of workforce size or location.

Centralised and simplified, JT's WAN is a networking infrastructure connecting remote sites, allowing organisations to share highly sensitive data, voice or video traffic between multiple locations. JT Managed WAN can be provided over various delivery methods, so we can implement the right service for your needs. As an example, JT's MPLS can be integrated with the WAN, optimising resiliency, scalability, and flexibility to the centrally managed infrastructure.

Performance

- Quality of Service for functionality, agility and manageability
- Seamless monitoring and connectivity
- Guaranteed up-time, network performance and resilience

Cost Effective

- No need to invest in legacy infrastructure
- Reduces operational complexity for businesses

Secure
