JT Managed Wi-Fi

Product Description

JT Cloud Managed Wi-Fi is an advanced wireless network powered by Cisco Meraki that helps you do better business. Simple and reliable, it allows you to support a flexible workforce, provide secure access to customers, and, through increased visibility, understand customer behaviour and trends.

Simplicity

Centrally managed

Whether you are a single premise or multi-location business, JT Managed Wi-Fi is an easily deployable, comprehensive, integrated solution offering a seamless experience to meet changing user expectations.

JT take care of quality control and security, troubleshooting and updates, alongside simplified administrative processes and operational efficiencies.

Visibility

Monitor, analyse, and respond to user behaviour

Utilising our analytical tools, JT can provide optimised network-wide visibility, granular reporting, and user behaviour analytics, allowing you to learn about your customers' activity.

By understanding how employers or customers use your network, you can anticipate and accommodate their needs, remain relevant and competitive, and ultimately improve your offering.

Reliability

Performance

- Highest grade access points
  - Faster connections
  - Greater user capacity
  - Wider coverage
  - Fewer support calls
