

JT Next-Generation Managed Firewall

Product Description

At JT, we understand the need for Channel Islands businesses to have a reliable and secure internet connection. As more and more cybersecurity issues threaten our shores, we are never safe from the world of cybercrime.

Business-Critical Security

Hackers have discovered ways to bypass traditional firewalls, and in response we are pleased to now be able to offer a professional quality, Next-Generation Managed Firewall and Intrusion Protection service to provide substantial protection from future threats entering your network.

Working with industry leader Cisco Meraki, our Next-Generation Managed Firewall is designed to inspect the traffic passing through the network at any given time, using analytics and threat intelligence to spot and block attacks before they impact your business. We offer the latest security features to protect the integrity and confidentiality of your sensitive data from the latest advanced threats including:

- Deep packet inspection to look inside the data for malicious code
- Cyber Threat Intelligence feeds to block 'bad actors' and protect you from new and emerging threats
- Single point of contact for your service management, ensuring fast troubleshooting and issue resolution
- 'Snort' Intrusion protection and Cisco Cyber Threat Intelligence to understand how applications are used and how they will be compromised

53%
of midmarket companies
have experienced a breach.

Small & Medium Business Edition*

24x7 Cyber-Protection

Ensuring your services remain online and available to your end customers, and preventing confidential customer information reaching the wrong people is essential.

The JT Managed Services Team (MST) will actively monitor your network security and in the event of a cyber threat being discovered, we will alert you and work with you to resolve the issue.

- JT can manage the complete Quality of Service of your internet connection
- In the event your broadband connection fails, your service will automatically failover (switchover) to our super-fast 4G mobile network, giving you peace of mind at all times
- Our MST will repair the connection without interrupting your business
- Our MST is available 24x7, proactively mitigating and protecting against cyber attacks
